

SB 272 Compliance

Disclosure of Enterprise System Information Pursuant to SB 272 / Government Code

6270.5 The Enterprise System Catalog Table Is Located on the Following Page (Updated July 7, 2017).

Approved on October 11, 2015, SB 272 adds a section to the California Public Records Act requiring state and most local government agencies to create a Catalog of Enterprise Systems by July 1, 2016, with annual updates.

Enterprise System Definition

An Enterprise System, as defined by Senate Bill 272, is a software application or computer system that collects, stores, exchanges, and analyzes information an agency uses that is both of the following:

- A multi-departmental system or a system that contains information collected about the public.
- A system that serves as a “system of record” or an original source of data within an agency.

An Enterprise System does not include any of the following:

- Information technology security systems, including firewalls and other cybersecurity systems.
- Physical access control systems, employee identification management systems, video monitoring, and other physical control systems.
- Infrastructure and mechanical control systems, including those that control or manage street lights, electrical, natural gas, or water or sewer functions.
- Systems related to 911 dispatch and operation or emergency services.
- Systems that would be restricted from disclosure pursuant to Government Code Section 6254.19.
- The specific records that the information technology system collects, stores, exchanges, or analyzes.

Requirements

1. Create a catalog of enterprise systems, containing:
 - Current system vendor
 - Current system product
 - System's purpose
 - A description of categories or types of data
 - The department that is the prime custodian of the data
 - The frequency that system data is collected
 - The frequency that system data is updated
2. To make the catalog publicly available upon request.
3. To post the catalog in a prominent location on the agency's website.

Exception

If the public interest served by not disclosing the information described clearly outweighs the public interest served by disclosure, the local agency may instead provide a system name, brief title or identifier of the system.

Hightail	Hightail	Document Management	Large Document Storage/As-Builts	Administrative Analyst	As Needed	As Needed

Diablo Water District will maintain the Catalog of Enterprise Systems provided that it doesn't compromise the District's network and/or security system. The District is unable to post other enterprise systems due to their association with security and critical infrastructure related to the District's water utility system.
